Gargi Jaiswal

Agile, Diligent and Focused

I am an enthusiastic and driven Computer Science graduate with a Bachelors degree from the University of Petroleum and Energy Studies. I am currently looking to secure a position in the organisation where I can make best use of my strong data analytical skills and creative thinking.

EDUCATION

Under-Graduation

University of Petroleum and Energy Studies.

07/2017 – Present

Dehradun, CGPA - 8.4

Courses

- Bachelors in Technology - CS with Specialization in Open Source and Open Standards

Schooling

Maheshwari Girls Public School

2014 – 2017

Jaipur

Courses

- Senior Secondary Education, Higher Secondary Education

PERSONAL PROJECTS

Human Detection in Low Light Areas (01/2020 – Present)

- Project uses the concept of machine learning to detect the human using IR sensors in dark environment. The project involves the sensing of the infra-red rays that emits when heat is generated from the human body. It uses the Thermal Image Processing Technique in the given dataset.

Devise and Implementation of proposed hybrid data structure using existing data structures (08/2019 – 12/2019)

- Project focuses on re-implementing the existing polynomial arithmetic algorithms and devising a hybrid algorithm for polynomial division using linked list and linear search.

CERTIFICATES

Python for Data Science and AI by IBM (02/2020)

Learnt how to efficiently implement python concepts and developed an understanding for DataScience and AI

Machine Learning with Python (04/2020)

Learnt about applications of ML in different fields, the advantage of using Python libraries for implementing ML models.

ACHIEVEMENTS
